

FEELOSOPHER'S PATH SUMMER CAMP

COVID PREVENTION PLAN

Thank you for doing your part to keep our camp community safe this summer! Our approach to preventing the spread of COVID at camp is informed by the most recent science and is based on layers of prevention.

1. Our staff is **vaccinated** (or has a current, negative COVID test)
2. We have abundant **ventilation** (FP camp is outdoors!)
3. We have **stable groups** (we only have one cohort of staff/campers per week)
4. We practice **hand hygiene** (we use sanitizer/wash hands before eating or sharing materials)
5. We do **symptom screening*** (staff and campers will do symptom check each day)
6. We use **masks** according to current CDC recommendations (see below). Masks will be required in vans, in bathrooms, and during activities with close contact. They will be optional when outdoors with ventilation.

***Daily Symptom Check**

Please stay home from camp if you have any of the following symptoms (that are not explained by another condition, e.g. allergies). We will refund you for any days missed for this reason.

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Outdoor Mask Use

Our mask policy is based on the CDC's latest guidance for use of masks outdoors. The fact that our camp is held outdoors, and that there is very low community transmission at this time, means that masks can be optional during most outdoor camp time.

From CA Department of Public Health (updated 6/14/21):

Does anyone need to continue to wear masks outdoors?

In general, people do not need to wear masks when outdoors. However, per CDC recommendations, in areas of substantial to high transmission, people who are not fully vaccinated are encouraged to wear a mask in crowded outdoor settings or during activities that involve sustained close contact with other people who are not fully vaccinated.

Will unvaccinated children and youth be required or recommended to wear a mask during recess outdoors if they cannot maintain physical distancing?

In general, unvaccinated children and youth do not need to wear a mask outdoors, even if they cannot maintain physical distancing. However, per CDC recommendations, in areas of substantial to high transmission, people who are not fully vaccinated are encouraged to wear a mask in crowded outdoor settings or during activities that involve sustained close contact (including high-risk contact sports) with other people who are not fully vaccinated.
